

MANIVANNAN P

UI Frontend Developer

manivannanp0619@gmail.com | +91 6374371082 | Chennai

www.linkedin.com/in/Manivannan19

Career Objective

Frontend Developer with 3.7 years of experience in building dynamic, responsive, and high-performance web applications using ReactJS and JavaScript. Skilled in developing scalable user interfaces, optimizing performance, and ensuring seamless user experiences. Strong collaborator with a focus on clean code practices, maintainability, and continuous learning in modern frontend frameworks and tools.

Skills

- Frontend Development: React.js, Redux, HTML5, CSS3, JavaScript (ES6+), TypeScript
- UI Frameworks & Libraries: Bootstrap, Material UI, jQuery
- Testing & Debugging: Jest, Chrome DevTools, Postman
- Tools: Git, SVN
- Build Tools & APIs: Axios, Webpack
- Responsive Design: Cross-browser Compatibility, Mobile-first Design, Flexbox, CSS Grid

Professional Experience

Perpetuiti Technosoft Pte Ltd | Chennai, India

Dec 2022 – Jul 2025

Frontend Developer

- Designed reusable custom hooks for API calls, debounced search, and global event management.
- Improved page load speed by 25% through lazy loading and Webpack code optimization.
- Implemented secure encryption and decryption workflow using Webpack.
- Optimized UI responsiveness using React Suspense and route-based chunking.
- Developed validation frameworks using React Hook Form and Yup.
- Integrated biometric authentication fallback (Face ID, fingerprint).
- Developed DR Scheduler Calendar with real-time sync and drag- and- drop.
- Created modular Axios interceptor- based API architecture.
- Implemented skeleton loaders and shimmer effects to improve UX.
- Achieved 90%+ test coverage using Jest and React Testing Library.

Apzio Technologies Pvt. Ltd. | Chennai, India

Jul 2021 – Jul 2022

Frontend Developer

- Created dynamic admin panels using React Table with CRUD operations.
- Converted designs from Figma into production- ready UI.
- Enforced code quality using ESLint, Prettier, and strong TypeScript typing.
- Built reusable UI components reducing duplication by 40%.
- Integrated WebSocket features for real- time updates.
- Migrated class components to functional components using hooks.
- Improved build process using Webpack and Babel.
- Improved backend data access by reducing latency using optimized API structure.
